Giving every child a healthy start to life

ICPH is an innovative model of integrating primary care with public health, where the best of global knowledge steers our comprehensive interventions for children.

Primary Care | Public Health Practice | Academic & Capacity Building Programs | Research & Policy

ICPH is proud to present its first

Annual Report

April 2017 – March 2018
The International Center for Child and Public Health (ICPH) is an innovative model of integrating primary care with public health, where the best of global knowledge steers the provision of comprehensive interventions for children and the community.

ICPH aims to become a nodal institution for clinical practice, active research, and global policy making in child and public health, building on Shanti Ashram’s 30 years of community service and leveraging its long-standing international and local partnerships.

The Team and Structure: Convergence of expertise & experience

What we do today determines our tomorrow.
Special Interventions saw a synergistic model being adopted to develop and strengthen the Center’s core areas of work which and includes Well Child Outreach (for children living in poverty), Routine Immunization (for vulnerable communities), Health Services & Education (for adolescent girls and boys), Non-Communicable Disease Screening (for families), Sanitation & Hygiene (cross-settlements).

Public Health & Research Desk aims to improve the conditions and behaviors that affect health so that all people can attain it. The mission includes not only the practice of public health policy, but the research of public health issues and the education of future leaders to help translate the research into practices to improve the health of people. ICPH is currently implementing eight projects, of which “Building an Innovative Model for Child Health to serve vulnerable communities in Southern India” has the distinction of being awarded Rotary Internationals’ Global Grant. It was jointly supported by Rotary Club of Coimbatore Heritage, Wurzburg, and Neckertal.

Special Capacity Building aims to provide accredited continued medical education (CME) tailored to the needs of healthcare providers in line with the needs of the community. The program also targets different stakeholders who impact child health, including families, educators, social workers, and children themselves to increase awareness of healthcare services and drive its utilization. 15 capacity building programmes with 124 partner institutions were held in the last year.

Knowledge Management at ICPH is designed to capture new learnings across service delivery, engage with experts, and study the status of health in communities. Focus is on field-based research, sharing findings with the wider academic and professional community, and presenting evidence-based practices for improvements in public policy. Four initiatives were rolled out, namely the Case Study Series, the Compilation of Public Health Perspectives, Global Classrooms, and Meet the Experts.

And to build on the 1st years’ achievements, we at ICPH seek your goodwill and generous contributions towards realizing the vision of ‘Giving every child a healthy start to life.’

Contributions to ICPH can be drawn in favor of Shanti Ashram Trust. All donations are tax-exempt under Section 80G.
